A true classic deserves the best, and when it comes to electronic ignition there is no match for Lumenition.

Known for its accuracy and durability, Lumenition is the leading name in electronic ignition. Since the 1960s, our proprietary Optronic system with the infra-red trigger has proved to be a reliable British classic of its own. Replacing points with the Optronic system is particularly beneficial for older vehicles, as Lumenition keeps the engine in perfect tune and promotes optimum performance.

And don't forget
**Protect your Classic with a Lumenition adjustable
Rev Limiter**

Accidental over-revving can lead to costly engine damage. By simply fitting a Lumenition Rev Limiter your engine revs will be electronically limited to a safe engine speed. Unlike some manufacturers, Lumenition's proprietary optical method of control does not cut the ignition current at the wrong time, producing a miss-timed spark, which can cause engine damage. Limit range: 4cyl: 4,500-18,000 rpm, 6cyl: 3,000-12,000 rpm, 8cyl: 2,250-9,000 rpm.
